OBJECTIVE

Dedicated Software Developer with expertise in Python, Java, and full-stack development. Looking to contribute to high-quality, scalable software solutions while continuously improving system performance and delivering innovative features.

TECHNICAL SKILLS

- Python
- JavaScript
- Java
- MySQL
- HTML
- Eclipse
- CSS
- VS Code

PROJECTS

Smart Recruitment Data Parser

Built an automated resume parsing system using Python and NLP, achieving over 90% accuracy in data extraction. Designed a scalable and efficient pipeline capable of processing PDF, DOCX, and TXT resume formats. Implemented intelligent text processing to structure candidate details such as skills, education, and experience. Significantly reduced manual resume screening time by approximately 60% through automation.

Food Delivery Application

Developed a full-stack food delivery application that allows users to browse restaurants and place orders online. Implemented cart management, secure payment processing, and real-time order tracking features. Designed a responsive and user-friendly interface to enhance customer ordering experience. Built an admin system to efficiently manage restaurants, menus, orders, and delivery operations.
